Oscillators and Signal Generators Report

梁程捷(B11901136), 吳奕娃(B11901080)

Generation of Triangular and Square Waveforms

Output waveforms of CH1 and CH2 in Y-t mode

From the figure, the output frequency is 712.3 Hz

Conclusion

The generation of square wave is from the output of non-inverting bistable circuit, and the triangular wave is from the output of the square wave through an integrator.

Reflections

梁程捷

這次實驗感覺很有趣,電路也不會太困難,也理論課對上了,在沒有外接function generator的情況下就自己產生了波形。

吳奕娃

我覺得這次的實驗相對簡單,第一次嘗試就成功了,這個電路在沒有接示波器的情況下產生方波 和三角波,讓我覺得很有趣。
